White Rose Forest Geographic Information System and Data Management Project Officer

Kirklees Council is the accountable of the White Rose Forest (WRF) joint venture agreement and is looking to expand its staff resource for this Yorkshire based community forest partnership.

Technical Competencies

1	Degree level qualification in a subject with an analytical content, or can demonstrate an ability to work at that level.
2	Experience of using a geographic information system to analyse and interpret large data sets.
3	Experience of data capture, extraction, analysis and management of complex datasets across a variety of applications
4	Knowledge of the sources of information relevant and available to local authority analysts (e.g NOMIS, Stat-Xplore, ONS).
5	An excellent knowledge of the methods and techniques available for statistical analysis, particularly GIS methods and techniques.
6	Proven ability to interpret data, formulate options and present reports to support service and corporate policy development
7	A good working knowledge of local authority obligations under GDPR, information security, Freedom of Information and Open Data legislation.
8	The ability to design and manage systems requiring multiple users and applications
